

FLECK Reductions

Adapter DN 70–DN 100

PRODUCT INFORMATION

Adapters and reducers enable the connection of pipe connections with different diameters. The multi-step FLECK adapter connects a DN 100 pipe with plastic or metal pipes or pipe sockets from DN 70–DN 100. With a suitable tool, it can be shortened to the desired connection dimension. The plumbing pipe adapters reduce from a DN 100 pipe to a DN 90 pipe (inside 86 mm) or to a DN 90 pipe socket (inside 90 mm).

Material

Made of highly weather-resistant, durable special rigid PVC.

Optional accessories

Rigid PVC adhesive

Construction material (fire reaction) class

B2 as per DIN 4102

Plumbing pipe adapter DN 90 and DN 100
