Leaf screen closed over the flat roof drain

**Sectional view:**  
Leaf screen opened over the flat roof drain

Dimensions in mm

## PRODUCT INFORMATION

The ROOFGUARD is a patented leaf screen with lift mechanism. It reduces the risk of blocked flat roof drains and removes critical backwater at an early stage, before damage is caused. For drains and gullies with a flange diameter of 60–200 mm.

### Material

- ASA
- Colours: Black/Orange

### Number of feet

Three feet

### Components

- Two-piece screen element, consisting of a rigid, screen element (black) that can be unscrewed and a movable screen element (orange)
- Three individually removable float outriggers (black)
- Aluminium check small plates to indicate a malfunction that has occurred

### Construction material (fire reaction) class

B2 normal flammable

### Note

The leaf screen is fixed to the gully flange by means of adhesive and without penetrating the roof waterproofing (see installation instructions).

### Optional accessories (see p. 2)

- Parapet extension
- Gravel trap
- FLECK connect

### Installation instructions
