

# FLECK Drainage vent

## PRODUCT INFORMATION

Drainage vents provide pressure equalisation wherever flowing water in closed pipes can create undesirable pressure fluctuations. Due to the standardised pipe diameters used, they can be easily inserted into corresponding HT pipe sockets. In combination with FLECK connecting sleeves and PVC adhesive, the upper pipes of FLECK vents (DN 70 to DN 500) can be subsequently extended by a further 500 mm (e.g. in snowy areas).

**Standard length\***  
0.50 m

**Material**  
All components are made of highly weather-resistant, durable special rigid PVC.

**Accessories**  
Removable weather cap only with DN 125

\* other lengths also available on request

## TECHNICAL NOTES

Nominal diameter	A	B	Vent cross-section (cm <sup>2</sup> )
DN 70	115	60	~ 39
DN 100	160	90	~ 87
DN 125	210	100	~ 113
DN 150	240	115	~ 170
DN 200	305	150	~ 298
DN 250	380	150	~ 471
DN 300	480	200	~ 754
DN 400	610	275	~ 1,212
DN 500	770	340	~ 1,880
